## HiWi/student assistant (m/w/d) in the research project ECOLOPES

The professorship for **Green Technologies in Landscape Architecture** is looking for a HiWi/student assistant in the research project ECOLOPES.

In ECOLOPES (ECOLOGical enveLOPES) we propose a radical change for city development: instead of minimizing the negative impact of urbanisation on nature, we aim at urbanisation to be planned and designed such that nature – including humans – can co-evolve within the city. We envisage a radically new integrated ecosystem approach to architecture that focuses equally on humans, plants, animals, and associated organisms such as microbiota. ECOLOPES will provide the technology that will help to achieve this vision.

Further information: [www.ecolopes.org](http://www.ecolopes.org)

## Tasks and requirements

Tasks:

- Public relations: Social media (facebook, twitter, Instagram, linked in) Website etc.
- Preparation of Presentations, Layouting etc.
- Preparation of meetings, taking minutes etc.
- Supporting the writing of reports etc.
- General organization and administration (time planning, travel etc.)

Main requirements:

Voraussetzungen: Reliability, thematic interest, flexibility, structured and self-directed work, good English skills. Good German language skills are welcome but not a prerequisite.

Field of study: Preferably landscape architecture or architecture/urban studies, but also related fields of study such as resource-efficient and sustainable design, environmental engineering etc.

## Job specifications

450 € basis (approx. 7.5 hours/week; by arrangement also up to 15 hours/week)

Place of work: Main Campus

Planned start: 01.10.2021

We are very interested in a long-term employment relationship for at least 2 semesters.

## Contact and Application

If you are interested, please send an e-mail with a short letter of motivation and CV to **ferdinand.ludwig@tum.de** by **10.08.2021**.
