1. Campbell Barracks, 2. Patrick Henry Village, 3. Patton Barracks, 4. U.S. Army Hospital, 5. U.S. Army Airfield, 6. U.S. Army Radio signaling tower

Topic:

We are focusing on repurposing abandoned U.S. military barracks in Heidelberg and Darmstadt into sustainable, long-term housing to address the local housing crisis. These buildings, vacant since 2013, were originally designed for short-term use by soldiers and their dependents. Our goal is to transform them into modern, livable spaces that can accommodate the growing demand for affordable housing. By redesigning the barracks, we not only provide a solution to the housing shortage but also preserve and breathe new life into historically significant structures for the benefit of the local community.

Adapting for Modern Living:

We plan to redesign the barracks, originally built for short-term military use, to include updated amenities and features suited for long-term, comfortable living.

Repurposing Vacant Barracks:

These buildings, abandoned since 2013, were originally designed for short-term use by soldiers and their dependents. We want to give them a new purpose by converting them into modern living spaces.

Preserving History:

We want to preserve the historical value of these barracks while giving them a new life that benefits the local population, combining heritage with innovation in a meaningful way.

Barracks Reboot:
